ABOUT US

Family owned and operated since 1988...

McNamara Fencing was established in 1988 by Jerry McNamara, near Mitchelstown, Co. Cork as a fencing and agricultural contracting business. Over the years it has grown into a leading supplier of highest quality, innovative fencing systems for Agricultural and Equestrian applications.

McNamara Fencing has been at the forefront of innovative fencing systems. In 1999, we installed the very first Electric Horse Cable in Ireland. In 2003, we introduced the 'Flexible Rail' horse fencing system to the Irish market and in 2009, we introduced our Superknot horse safe mesh. In 2014 McNamara Fencing introduced a range of stabling and accessories to complement our equine fencing range.

McNamara Fencing have a diverse and loyal customer base ranging from Farmers, Local Authorities, Fencing Contractors, Stud Farms and equestrian establishments from County Cork across Europe, and even to Africa and South America.

We look forward to your enquiry!

5" FLEXIBLE RAIL SYSTEM

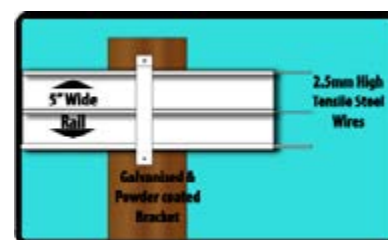

5" HIGH TENSILE RAIL SYSTEM

HIGH TENSILE RAIL SYSTEM

McNamara Fencing's Flexible rail system is a continuous flexible polyethylene rail with three high tensile steel wires embedded in the plastic to give strength to the rail.

This rail is a tensioned fence and acts like a belt around your paddock. The rail is attached to wooden posts with steel brackets, which allow the rail to move in and out when pressure is applied to the Rail at any point along the fence line.

Bracket system allows fence rail to flex in event of impact and cushion any impact without damaging the fence.

FEATURES

- 1.8 tonnes breaking strength ensures that no animal will get through the fence
- Easily re-tensioned if required
- No painting required
- Extremely durable: withstands cribbing, kicking and is UV stabilized
- Black, Brown or white colours available

RAIL ROLLS

CODE	DESCRIPTION	LENGTH
FR5200 (BLK, WHT, BRN)	Flex Rail: 5": Black	200m
FR5100 (BLK, WHT, BRN)	Flex Rail: 5": Black	100m

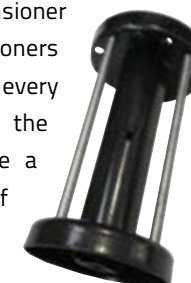

RAIL ACCESSORIES

INLINE TENSIONER

Tensioners are used to tension the Rail. To tension the rail, simply insert 2 ratchet drives into the top and bottom of the Tensioner and rotate. Tensioners should be placed every 100 metres along the Rail. Tensioners are a permanent fixture of the fence and can be used anytime to re-tension the fence.

CODE: FR55

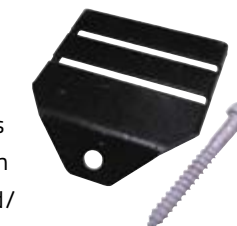

JOINING BUCKLE (SPLICER)

Used to join one length of rail to another, without compromising the strength of the rail. CODE: FR5JB

END BUCKLE & SCREW

Attaching buckles are used to attach the Rail to an End/corner post. Buckle is fastened to End post using a Hot-dip galvanised coach screw. CODE: FR5EB

LINE POST BRACKETS

Steel Brackets hold the Rail on to the fence post using 2 galvanised nails or screws. CODE: FRB5

INSIDE CORNER BRACKET

Use where the rail is pulling away from the post. Useful for corners of Arenas etc. CODE: FR5ICB

SUPERKNOT™ HORSE FENCE

Maximum Safety

- Very close (50mm) vertical wire spacing and (100mm) horizontal wire spacing minimise chances of hoofs getting entangled in the fence.
- Springy texture provides safety in the event of an animal colliding with the fence.
- Unique Superknot™ joint has no sharp edges and ensures vertical wires cannot be moved by livestock.
- Strong, Long Lasting & Low Maintenance.
- Manufactured using 2.5mm High tensile wire throughout, which allows for longer intervals between posts and a stronger self supporting fence.
- Galvanised to BS EN 10244 Class A.

Extremely Versatile

Superknot™ Horse Fence allows pastures to be stocked with any type of animal with total peace of mind, while keeping unwanted wildlife/dogs out. Many customers choose the 90cm high to cover existing Post and Rail fences.

Strong Smooth Joint

Durable Superknot™ joint ensures fence wires cannot be pushed out of place by stock. It is smooth with no sharp edges.

V-MESH CLASSIC STUD FARM FENCING

FEATURES

The fence of Choice worldwide for safe containment of high value bloodstock.

Very close 2" (50mm) vertical wire spacing and 4" (100mm) horizontal wire spacing with verticals woven in a v formation minimises the chances of a hoof getting entangled.

Springy texture provides safety in the event of an animal colliding with the fence. Smooth texture without sharp edges.

Allows pastures to be stocked with any type of animal with total peace of mind, while keeping unwanted wildlife/dogs out.

MESH FENCING ACCESSORIES

TYING OFF CLIP

Convenient system of tying off wire at your End Post. Not Suitable For V-mesh.

CODE: TCLIP

FASTLOK JOINER/TENSIONER

Join your Superknot with these convenient joiners. Just push your wire into the joiner and it locks! No need for tying. The Fastlok can also be used to tighten your Superknot when used in conjunction with the Tensioning Tool. CODE: FASTLOK

CRIMP SLEEVES

Used to Join V-mesh Rolls together.

CODE: CRIMPSLEEVE

CRIMP TOOL

Required to apply Crimp sleeves to wire.

CODE: CRIMPTOOL

BARBED STAPLES

High Quality Staples for Mesh to wooden line posts.

- Barbs for extra holding power
- 40mm x 4mm size

5 kg Box CODE: STAPLE40x4x5kg
20 kg Box CODE: STAPLE40x4x20kg

CLAW STRAINING TOOL

Handy tool for Straining Short runs of wire.

WIRE CUTTER

Economy Cutter
CODE: WIRECUTTER
Professional Cutter - Felco
CODE: FELCO

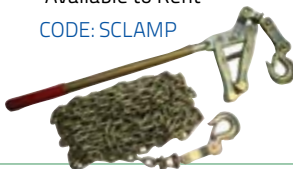

JOINER TENSIONING TOOL

Use with Joiner/Tensioner. This handy Tool enables short stretches (<100m) of Mesh to be tensioned by pushing the Joiner/Tensioners along the fence.

STRAINING CLAMP PULLERS

- Used to pull the Straining Clamp
- 6 metre chain with hook
- Available to Rent
CODE: SCLAMP

MESH STRAINING CLAMP

Tension your Mesh evenly using a straining clamp. Grabs all the horizontal wires together for an even pull.
• Use with optional Straining clamp Pullers
• Available in 1.2m, 1.5 or 2.0m heights
Available to Rent
CODE: FKCLAMP (4,5,6)

ELECTRIC HORSE CABLE SYSTEM

- STRONG & DURABLE
- VIRTUALLY MAINTENANCE FREE
- PERMANENT SOLUTION

SAFE

Electric Horse Cable was designed from the outset to be a safe fence for horses. Due to its high-tensile steel core the fence reduces the chance of the fence 'wrapping around' your horses should they impact it. Smooth Polymer coating protects the horse's skin from abrasions or grazes.

ELECTRIFIED

Electric Horse cable is conductive making it also suitable for holding cattle and because the fence is electrified animals will not abuse the fence.

STRONG

Electric Horse Cable's minimum breaking strength is 635 kgs per wire.

PERFECT AS A STANDALONE FENCE

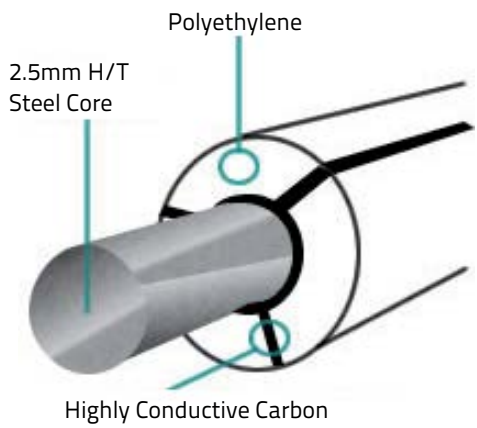

Electric Horse cable is perfect as a standalone fence with 1 or more strands of cable. Electric Horse cable is also available in Black making it ideal perfect for electrifying existing post and rail fences.

SPECIFICATIONS

Total Diameter: 8mm Steel Core: 2.5mm High Tensile wire galvanised to BS 10244 Class A

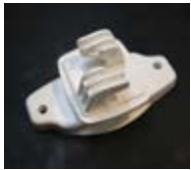

Flexible Rail with 2 Strand Electric Horse Cable combination fence.

Electric Horse Cable is a polyethylene coated 2.5mm high tensile steel wire with multiple strips of conductive carbon carrying the electrical current from the wire to the surface.

CODE	DESCRIPTION	LENGTH
EHC350W	Electric Horse Cable: White	350m
EHC350B	Electric Horse Cable: Black	350m
EHC350BR	Electric Horse Cable: Brown*	350m

ACCESSORIES

LARGE CLAW INSULATOR

Heavy Duty Insulator: Insert/Remove Cable at 45 deg angle. Black or White colours available. Pack of 25 or 200
Black CODE: LBCI (25, 200) | White CODE: LWCI (25, 200)

PINLOCK INSULATOR

Heavy duty insulator. Removable Pin. Attaches to line posts using galvanised staples, nails or screws. Pack of 25. CODE: LWPI

JOINER TORPEDO

Joins 2 lengths of cable quickly and easily. Just strip back the plastic from the cable and push in the wire and it locks tight. CODE: TORPEDO

END STRAIN INSULATOR

High Strain End Insulator. Pack of 25 CODE: SREI

INSULATED RATCHET STRAINER

Used to tension the cable. Attaches to the end post using wire and is also insulated. CODE: IRS

INSULTUBE 30M ROLL

Insulating Tube for corner posts/ at corners. Black or White Colours. CODE: INSULTUBEHC (BLK, WHT)

POST & RAIL FENCING

CALL TODAY

REQUIREMENTS **T: 022 40723**

Superior Timber

- McNamara Fencing's Post and Rail Fencing is manufactured from imported Redwood (pine), Larch and Douglas Fir only. These species are naturally more durable than native timbers and retain higher levels of Preservative.

Superior Treatment

- McNamara Fencing's Post and Rail Fencing is preserved to the Highest Standards. Before undergoing Pressure Treatment, our timber is dried to low moisture content. Only then is the timber pressure-treated with Genuine Coal Tar Creosote or where creosote is not suitable Water-borne preservatives can be specified also.

Suitable for Horses

- Unlike other Preservatives, Pressure-Creosoted timber does not contain salt and is therefore unpalatable for horses to crib. It is the only suitable Post & rail option for Horse Paddocks, Arenas or Lunging Rings.

MCNAMARA DURAPOSTS

TIRED OF REPLACING ROTTING WOODEN POSTS?
CHOOSE THE HIGH QUALITY ALTERNATIVE... DURAPOSTS

In recent years,the problem of failing farm fencing posts has become particularly common. From more than 28 years experience in the fencing business, McNamara Fencing has learned which posts last and which ones don't.

McNamara Fencing DuraPosts are manufactured from imported European Larch, Scot's Pine and Douglas fir. These species are naturally more durable and retain more preservative than Native whitewood (Spruce). They are strictly dried to low moisture content and only when dry enough, they are Pressure treated with Genuine Coal Tar Creosote for maximum penetration.

Duraposts are treated using Genuine Coal Tar Creosote (which contrary to popular belief is still available for Commercial and Agricultural use) as it is the oldest and most reliable wood preservative available as evidenced by its usage in Electricity poles across the country.

Sizes Available - We stock a broad range of sizes and diameters in both peeled and machined round finishes. Call us for details.

DuraPosts exceed
NSAI specification IS437:2007

OAK RAILWAY SLEEPERS

NATURALLY DURABLE HARDWOOD OPTIONAL PRESSURE TREATMENT

Oak is a naturally durable hardwood that is suitable for ground contact application without any chemical preservatives. This makes it very suitable for applications where children or plants may be in contact with the sleepers.

We can also supply these sleepers pressure treated with water-borne preservative where extended life is required or pressure creosoted for maximum life expectancy in non-domestic applications.

SUPERKNOT™ STOCK FENCE

THE STRONGEST, MOST ROBUST AND LONGEST LASTING STOCK FENCE AVAILABLE!

Superknot™ Stock fence is constructed using the unique 'Superknot'. This revolutionary knot fixes the vertical wire in place ensuring that it cannot be moved out of place by stock.

The Superknot also allows for wider spaces between the vertical wires as there is no danger of stock putting their heads between the verticals and moving them out of place.

This feature gives the fence far greater vertical rigidity than conventional stock fence.

The Superknot is smooth, with no sharp edges that could damage an animal's hide or fleece.

REQUIRES FEWER POSTS

Unlike traditional stock fence, Superknot Stock fence is constructed with a single uncut vertical wire. This construction allows the vertical wire to act like a batten and supports the horizontal wires.

This allows Superknot to be installed with up to 50% fewer posts than traditional High Tensile stock fencing.

ELECTRIC FENCER ACCESSORIES

1 METRE EARTH BAR
T-Shape for maximum surface contact.

CUT OUT SWITCH

Use to switch current on or off independently of the Fencer unit.

Useful for isolating parts of your farm to keep voltage up.

FAULT FINDING VOLTMETER

Pinpoints where your fence is earthing out. Gives very accurate voltage readings.

LEAD OUT CABLE

Used to connect your Fencer to your Fence wire and earthing system and/or bringing power under Gates/Gaps or roadways:

- 1.6mm x 10m roll
- 2.5mm x 50m roll
- 2.5mm x 200m roll

LIGHTNING DIVERTER KIT

Mount on wall or Fence Post. Diverts lightning away from fencer and into the ground. Essential where Fencers are installed indoors.

FENCE TESTER ECONOMY - 8 LIGHT

Shows voltage up to 8000v.

ELECTRIC FENCE WARNING SIGN

PLANNING & INSTALLATION SERVICE

McNamara Fencing offer a full planning and installation service. We can advise and design a fencing system to suit your individual needs and budget, supply the necessary materials at best prices and if you want we will erect the fence for you.

Using state of the art equipment and highly trained staff, McNamara Fencing's installation service is second to none. Our professional and experienced installation staff are highly trained and regularly liaise with fencing manufacturers to ensure we have the most up-to-date and best methods of installation.

STABLING & STABLE ACCESSORIES

McNamara Fencing also supply a line of Stabling and Stable Equipment.
